## What should you be doing to successfully exit your business?

Well, if you are not sure, you are certainly not alone here. With thousands and thousands of baby boomers approaching retiring age, most business owners have to face this question.

That is why we have combined our extensive commercial experience with world leading analytical frameworks, research and business tools gained from our MBA studies and designed this Business Exit Planning program to help you realise the value of your business.

### OUR BUSINESS EXIT PLANNING PROGRAM\*

- ✘ Starts with research to help us understand your business, your industry and your motivations;
- ✘ Provides indicative business value in the current market;
- ✘ Puts your business through a reverse due diligence to identify how you can increase the value of your business;
- ✘ Provides a clear action plan to increase the attractiveness of your business for potential buyers;
- ✘ Validates your business exit strategy;
- ✘ Takes you through the final sale process.

\* We stand by the quality and results for our Business Exit Planning program and recognise that this program does not suit every business. That is why we will ask you to go through our qualification process before we can enrol you in our Business Exit Planning program.
